This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.

+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.

+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.

+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

PREFATORY NOTICE.

THE proceedings which took place in the reign of Charles the First, relative to the ancient Property and Revenues of the Church of Scotland, are so well known as a matter of Public History, and have been so important in their practical effects on the interests of individuals, that any minute details on the subject, as introductory to the following volume, might be fairly regarded as superfluous. In connection with the arrangements which were then contemplated between the Crown and its Lay subjects, relative to the spiritual patrimony of the Church, it became necessary to provide for the regular and permanent endowment of its Protestant Ministers; and under a Royal Commission, which issued in January 1627, a certain number of persons of distinguished rank and consideration, were authorised, among their other functions, to institute the requisite inquiries

on that subject. Soon after their appointment an order appears to have been transmitted to the different Presbyteries, calling upon the clergy to make a minute and authentic return of the existing parochial establishments within their bounds, of the state and amount of ecclesiastical property in each Parish, of its present application, and of such other matters as might affect the general arrangements then contemplated. It is much to be regretted that the records of this Commission have been so very imperfectly preserved; and that even the terms of the order now alluded to, have not been found. To what extent the requisite Reports were obtained, cannot now be traced; but those from forty-nine Parishes, situated in different parts of Scotland, have escaped the general wreck; and scanty and imperfect as they are, may be regarded as an interesting contribution to the Local History and Statistics of the country in the earlier part of the Seventeenth century.

Theſe vnder writtin ar preſented be Sir James Dundas of Arniſtoun Knight

It is to conſidered that the landis of Arniſtoun with the pendicles thairof The lands of Eaſter and Weſter Halkerſtoune The lands of Eſperſtoune The lands of Hurdſpeth And the lands of Newbyres all pertining heritablie to Sir James Dundas of Arniſtoune were nocht able to ſawe the number of bollis, yeeld the incres, nor pay the dewtie they doe at the preſent, if they had nocht the benefite of coill and lymeſtane: ffor by the occaſioune of theſe twa the haill bounds of the ſaids lands that can be made arrable ar rivin out, manured and ſawne, And without the benefite of theſe twa, the half of theſe lands that ar now goodet, laboured and ſawne wald of force ly lie as in former times, and as vther rowmes doe that hes nocht the ſame, or ſum vther benefite of the lyk nature. And as to the caſualetie of coill, The endurance thairof is knawne be all coilmaiſters to be moiſt uncertane; without the quhilk, the benefite of lyme ſtane could ſerue to no vſe in this cace, yea the manuring with lyme (except the ſame be vſed with grett diſcretioune) may importe no lytle harme, and be tyme make the land to becum altogither barren and yeeld no incres, quhairof a gritt many in diuers pairtes of this kingdome doe alreddie find the duilfull experience, and the ſaid Sir James as ane throwe this occaſioun is forced to lett a pairt that wes wont to be his beſt fatland ly lie. As alſo if thir lands ſould fall in a pupils hands whoſe tutor or curatours be either ſkilles or careles, and perhaps bothe, how ſould the ſtock and teynd of theſe lands (the richt vſe of theſe benefites being neglected or abuſed) be maintained *communibus annis* at the hie rent they ar racked to at the preſent. So in regairde of the premiſſis the eſtate and rent both of ſtock and teind of theſe lands can never be valued nor repute conſtant except they be valued at the very ſame eſtate and worth they were before the lyming and no hiar, quhilk is referrit to the wyſe and judicious conſideratioune of the Lords Commiſſionars.

Our kirk of Ednem is nathar ſpacious nor ſpecious, for it is not able to conteine the halfe of our peopill at any ſolemne tyme of meiting It is not ſo weill wpholden as any barne or byr, and except it be helpit ſpedelie it is ruinous and tendis to falling, and our kirk yard dykis is lying with the ground and hes great nead off repairing.
